## SELECTED CONSULTING EXPERIENCE

As a data scientist for an economics consulting firm, Ivana has applied data science techniques and economic thinking across projects dealing with competition and regulatory settings. She has worked on cases across multiple jurisdictions and regulators like EC, CMA and FTC. Examples of her work include:

- The simulation of merger impact on market pricing and customer welfare for a high-profile merger between Refinitiv and the London Stock Exchange
- Data Science secondment at Meta where she supported multiple ongoing acquisitions including Meta's mergers of Kustomer, Giphy or Oculus
- Built and implemented a machine learning model for classifying customers with high cash flow volatility for one of the leading UK banks

## TECHNICAL SKILLS

- Programming languages: Python, R, SQL, Stata
- GIS: ArcGIS, QGIS
- Databases: PostgreSQL, Oracle, Hive, MS SQL Server, MS Access

## LANGUAGE SKILLS

- English – Fluent
- Slovak – Native
