## RELEVANT CASES

### As a consultant for The World Bank

- Assessment of the privatization process of Argentina railways. This case involved a field mission and numerous interviews with business, consumer and government representatives. The analysis included a detailed evaluation of the concessions and the impact of the process on sector efficiency and public finances.

- Assessment of the privatization process of Brazilian railways. This case involved a field mission and numerous interviews with business, consumer and government representatives. The analysis included a detailed evaluation of the concessions and the impact of the process on sector efficiency and public finances.

#### **As a consultant for The Inter-American Development Bank**

- Evaluation of the Barbados Tourism Incentives program. This case involved a field mission and a theoretical and empirical analysis of the incentive mechanisms designed by the Barbados government to boost foreign tourism.
- Cost benefit analysis of La Paz cableway in Bolivia. This case involved a field mission and a detailed assessment of the project consisting in the expansion of La Paz cableway, before a funding proposal to the IABD.
- Economic evaluation of projects with regional integration impact. This case consisted in writing a manual, a set of guidelines and two case-studies for the economic evaluation of any infrastructure project whose impact goes beyond national borders. The final document is available at IABD website as “Evaluación Económica de proyectos de infraestructura de integración regional” (in Spanish and English).

#### **As a consultant for Compass Lexecon**

- Sea Competition in the Canary Islands (ARMAS). This case involved the economic analysis of the inter-island passenger transport market by sea in the Canary Islands and the competition between the shipping companies Armas and Fred Olsen.
- The Truck cartel and its implications for Spain (IVECO). This case followed the EC decision in 2016 declaring the existence of a cartel among European truck manufacturers and involved the analysis of its implications in the Spanish market.
