## EDUCATION

2015, *M.Sc. in Engineering*, Mines Paristech  
2014, *Visiting Student Researcher in Geophysics*, California Institute of Technology (Caltech)

## PROFESSIONAL EXPERIENCE

2021 - Present, *Senior Economist*, Compass Lexecon, Energy Practice, Paris  
2019 - 2021, *Economist*, Compass Lexecon, Energy Practice, Paris  
2018 - 2019, *Senior Analyst*, Compass Lexecon, Energy Practice, Paris  
2015 - 2018, *Analyst*, CRE (French energy regulator), Renewable Energy Support Schemes Department, Paris

## SELECTED PROFESSIONAL ENGAGEMENTS

### Market Design

- Support for the reform of electricity markets in Middle East and West Africa countries: Advised stakeholders (government agency, IPP association) on the appropriate market design and transition path
- Feasibility study of the Transfer of Energy on DA/ID markets for a Western European TSO (2019): Analysed the potential for explicit DSR participation in the DA/ID markets based on international case studies
- Support for the implementation of a capacity market for a Western European electricity TSO (2018): Support in its design and its notification to the European Commission under the guidelines on State aid
- Detailed review of capacity remuneration mechanisms throughout Europe for an Eastern European TSO (2018): Conducted detailed review of context, design characteristics and first lessons of capacity remuneration mechanisms in France, Belgium, Germany, Italy and Spain
- Impact study of imbalance settlement period reform in France for the French energy regulator (2018): Conducted study to determine the optimal implementation year of the planned imbalance settlement period reform and identify regulatory and contractual changes involved

### Network Regulation

- Revenue modelling of a French gas TSO and storage operator (2018-2019): Development of a model to simulate the impact of different regulatory frameworks and incentives on the allowed revenue
- Regulatory and strategic support of a French gas TSO and storage operator (2018): Support in defining strategic orientations for its negotiations with NRA for the upcoming regulatory period

### Investment and Strategic Support

- Strategic and investment support for an Australian financial group (2018): Analysis of opportunities for battery-enabled power purchase agreements in Western Europe
- Strategic support to a Finnish Utility (2018): Study of the contribution of Finnish hydroelectricity to security of supply and energy and climate policy aimed to be used in public policy and potentially in litigation authority

### Regulation of The Energy Sector In The French Overseas Territories (CRE, 2015-2018)

- Designed the regulatory framework for electrical energy storage, energy efficiency and demand response
- Investment projects analysis and valuation
- PPA negotiation

## SELECTED CONFERENCES

- “*Flexibility: The Need for a More Coordinated Approach*”, OFATE, Seminar on the need for flexibility in the energy transition, Paris, 27 September 2018.
- “*CRE initiatives in electricity storage in the French overseas territories*”, ATEE, Seminar on energy storage, Paris, 22 November 2017.

## LANGUAGE SKILLS

- English (advanced)
- French (native)
- Spanish (intermediate)
- Russian (basic)
